INFORMATION AND DECLARATION FORM FOR TEETH WHITENING TREATMENT

	YES	NO
Are you under the age of 18?	<input type="checkbox"/>	<input type="checkbox"/>
Are you pregnant/breastfeeding?	<input type="checkbox"/>	<input type="checkbox"/>
Are you under radiation therapy treatment?	<input type="checkbox"/>	<input type="checkbox"/>
Are you allergic to Propylene Glycol, Glycerin or Sodium Perborate?	<input type="checkbox"/>	<input type="checkbox"/>
Do you have untreated cavities, dental fissures, gum problems, or other dental conditions?	<input type="checkbox"/>	<input type="checkbox"/>
Do you have a piercing or other metal objects in the oral cavity?	<input type="checkbox"/>	<input type="checkbox"/>
Did you have braces removed in the last 6 months?	<input type="checkbox"/>	<input type="checkbox"/>
Did you recently have an oral surgery?	<input type="checkbox"/>	<input type="checkbox"/>

If you feel a sharp pain on a particular tooth during the treatment you should stop and contact your dentist since this could be a sign of an open cavity.

Results Guarantee

I understand teeth whitening treatment will be efficient only on natural teeth. Artificial teeth cannot be whitened but will not be damaged by the treatment. I am aware that I can expect 2 to 10 shades whiter but my teeth will never become whiter than their natural color. People with yellowish teeth generally get the best results but I understand that everyone’s teeth are different and that results will vary.

Post-Treatment Care

I am aware that the 4 hours following a treatment are essential to guarantee its efficiency. I also understand that during this time I must only drink still water and do not smoke. For the following 20 hours I should avoid if possible all kinds of dark beverage and foods. Although uncommon with non-peroxide gel, I can experience tooth sensitivity during or after the treatment. In this case, Smile Center recommends a mineral pen containing de-sensitizing ingredients. After the treatment, it is natural for teeth color to regress somewhat over time. Teeth whitening results are expected to last between 1 to 3 months. Genetics and general hygiene may also have an impact on the length of the results. Obviously, non-smokers with balanced diet and people who have good teeth hygiene will have whiter teeth for a longer period.

By signing this document, I indicate that I am not ineligible as per the criteria listed above, that I have read and fully understand this entire document and that I am performing this cosmetic treatment under my own responsibility. I also certify that I have healthy teeth and gums.
