PRESS RELEASE

Get the perfect smile with Smile Center

An attractive bright smile can have a far greater effect on your life than you might realize. When people are confident about the way their teeth look, they are more apt to flash their smile and attract social attention. Recent research shows that whiter teeth can be a key factor in successfully getting a new job or a first date, as it makes you look more successful, employable, attractive and even five years younger. This obviously leads to a significantly positive effect on your self-confidence and self-esteem.

Located at the heart of LKF, Smile Center offers cosmetic teeth whitening treatment to recover the whiteness of your teeth. The relaxed atmosphere is worlds away from the scary dentist's chair, so just allow yourself an hour of "me-time" in their spacious center to get those pearly white.

It's a totally safe and painless process that uses peroxide-free products approved by the FDA, so there will be no side effects (like tooth sensitivity or gum sore). Plus, it's super speedy – you'll see sparkling results in less than an hour.

To reach this, you simply have to sit in our comfy egg chair and relax while you smile under a blue cold light. At the end of the treatment, we show you the actual result on the shade chart so you can understand how effective it has been. Customers can expect between 2 to 10 shades whiter (but never whiter than your natural color), which will then last up to 3 months. Exposure to dark beverages and foods like coffee, tea, tobacco, red wine, soy sauce and other stain-producing agents will darken the teeth over time. Age, genetics and general hygiene also have an effect on your results and their longevity.

Our clients appreciate the fact our treatments are fast, painless and safe. Many of them come before a special event like a wedding, upcoming date or job interview; others come just because they want to enjoy a bright smile all year long.

Complementing the teeth whitening treatments, Smile Center also features the Swarovski element tooth-jewels. This new service comes with a view to sophisticating and personalizing with a jewel an elegant smile in style.

Our genuine Swarovski crystals are available in 10 different colors: white, light blue, dark blue, light green, dark green, pink, purple, yellow, rainbow, and red. The tooth-jewels are ordered exclusively from our Swiss manufacturer to ensure our products are compliant, flawless and strictly in accordance with our guidelines, expectations and demands.

Involving no drilling, the pain-free application process is harmless to teeth and leaves the enamel intact. The jewel can last up to a year and will fall off while remnants of the glue disappear. It is safe for both natural and artificial teeth.
